CCX 4003

3.5 octave F4- C8 Vibercore Synthetic

* please note that the image is not available yet

Using the greatest care, we select wood, hand tune resonators and all our design skills to manufacture these superb lines of percussion keyboard instruments. Featuring the finest in traditional craftsmanship, the very latest in material and tuning technology we present you these instruments. Rich and focused in tone. The instruments are easy to transport and height adjustable through our patented VCL System. If the ultimate in sound an quality is what you want, consider these Royal Series of mallet instruments.

These excellent series of xylophones come with a choice of Honduran Rosewood, African Padouk or Vibercore synthetic bars. All xylophones are modular, easy to transport and equipped with VCL set up.

Most notable is the new Floating Bar Suspension System (FBS). This proprietary bar support system actually increases bar resonance by 20%! Precision laser cut bar support arms are angled to insure that each and every bar is supported exactly to the nodal point.

Bar Sizes: 40x23 mm

To realize the most stable and precise section, rails and endpiece had to be made out of first choice shaped and CC machined.

Inside the end piece a cut out chamber gives room for a solid special metal sheet for perfect and sturdy mounting of the rails.

To achieve perfection in construction and quality we always keep an eye on the natural look of the mallet instruments. A little different but perfectly designed and engineered. Vancore stands for innovation!

Vancore resonators are individually hand tuned and assembled using an exclusive mounting system. This system eliminates every kind of rattle or extraneous noise. Unlike other resonators welded or riveted, our system employs minimal contact technology. This virtually eliminates potential problems.

Double casters with brakes | Heavy duty

Our designers created a new and highly innovative concept to avoid the common and major problem with layers..... On top of that, the parsuspension and layer are integrated. One solution, on unique concept!

When only the best is good enough!

With just a 'press on the pedal' the height of the instrument can be easily adjusted. Comfort lifting resulting in a total free frame suspension, is realized by using durable gassprings to create an optimum of playing comfort.

CCX 4002

RANGE OVERVIEW

DIMENSIONS & WEIGHT

PACKED WEIGHT AND DIMENSIONS CCX 4003

Boxnumber	Content	Box Sizes		Weight	
		CM	INCH	KG	LBS
